PRODUCT DESCRIPTION

Light Weight Rolled Splint

Immobilisation is a critical item of care when responding to a casualty to limit the occurrence of further injury. Quality immobilisation using suitable products is integral to a full recovery of skeletal injuries.

Aluminium Foam Splints

An aluminium foam splint is a highly adaptive splint that can be rolled folded or formed into almost any application with the use of a quality support bandage. Available in a rolled or flat form, shrink-wrapped for protection.
This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
