PRODUCT DESCRIPTION

AeroAid Antiseptic satchets are designed to provide fast and effective relief from minor cuts and abrasions, minor burns, sunburn, insect bites, stings, and itches. Each satchet contains Melaleuca Oil 47.5 mg/g, Phenoxyethanol, and hydroxybenzoates, which work together to help prevent infection and promote healing. The antiseptic properties of the satchets make them an essential item for any first aid kit. To use, simply apply the contents of the satchet to the affected area 3 to 4 times a day. For minor burns, apply cold water first and then apply the cream later. However, for serious burns, seek medical advice immediately. If skin irritation occurs or the condition persists, discontinue use and consult a doctor. Store the satchets below 30C and keep out of reach of children. If symptoms persist, consult a healthcare practitioner. AeroAid Antiseptic satchets are a convenient and effective solution for minor skin irritations, making them a great addition to any first aid kit or outdoor kit.

AEROAID Antiseptic Cream Sachet 25g is a convenient and effective solution for minor skin irritations. The 25g tube is perfect to keep in your first aid kit.

This product is not a substitute for direct medical attention from a healthcare practitioner.
