<b>Is Serialized Item</b>	No
<b>Is Dangerous Good</b>	No
<b>Shelf Life (Months)</b>	60

**PRODUCT DESCRIPTION**

AeroBan Cohesive Bandage Tan is designed to deliver comfortable, compressive support while staying securely in place. The cohesive material adheres to itself rather than to skin or hair, helping to reduce discomfort when applying or removing the bandage. This makes it suitable for frequent re-wrapping and adjustments during everyday activities or active use. The tan colour offers a more discreet appearance on the body, which many users prefer for work, school, or public settings.

The flexible, elastic construction conforms closely around limbs, joints, and contoured areas so it can provide consistent support without restricting normal movement. The breathable design helps air circulate around the covered area, supporting comfort during longer wear. The bandage is latex free and described as hypoallergenic, which is valuable for users who wish to avoid natural rubber latex. Being non-sterile, it is suited to external support and fixation rather than direct application to open wounds.

This cohesive bandage is commonly used to provide light compression, help stabilise minor soft tissue injuries, and secure dressings or padded coverings in place. Because it does not rely on clips or separate fasteners, it can be quickly applied and torn to length by hand, simplifying use in home, workplace, sports, and clinic environments. The single-use design supports good hygiene practices, as each bandage is intended to be used once and then discarded.

- **Cohesive self-grip:** adheres to itself, not skin or hair, for secure yet comfortable hold.
- **Compressive support:** elastic structure helps support wrapped areas during daily activity.
- **Latex free and hypoallergenic:** suitable for users who need to avoid natural rubber latex.
- **Breathable construction:** promotes air circulation for added comfort during wear.
- **Tan, discreet look:** low-profile colour that blends more easily with skin tones in everyday settings.

The **Size 7.5 cm x 4.5 m** option offers broader coverage and extra wrap length, making it well suited to supporting larger joints or limbs where a wider cohesive bandage can provide more stable compression and secure dressing fixation.

Supplied as **12 wraps**, this option is convenient for topping up workplace, clinic, or team kits, offering multiple cohesive bandages on hand for recurring support, dressing retention, or sideline taping needs.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
