PRODUCT DESCRIPTION

The AeroBurn Burn Gel Dressing is a sterile, gel-impregnated pad purpose-built for first aid treatment of minor burns and scalds in workplaces, community settings, vehicles and home kits. Its water-based hydrogel helps cool the burn surface and soothe discomfort on contact, while the soft non-woven carrier lays smoothly over curved areas for quick, confident coverage. The single-use format supports best practice first response and straightforward disposal after reassessment.

Engineered as a protective covering, the dressing functions as a mechanical barrier during the critical early phase of care. The gel-infused construction helps manage minimal to moderate exudate, and the low-adherent interface supports gentle removal when it's time to review the injury. Because the hydrogel is water soluble, it can be rinsed away easily with clean water to support follow-up care and redressing.

Each dressing is sterile, single-use and sealed in an easy-open pouch with clear tear guides, aiding fast access when seconds matter.

Trusted by organisations that prioritise readiness and reliability, the AeroBurn Burn Gel Dressing helps teams deliver calm, effective

first aid. From kitchens and workshops to warehouses, classrooms and field vehicles, it's a practical choice that integrates seamlessly into first aid stations and mobile kits.

- Cools and soothes: water-based hydrogel helps cool burn surfaces and ease discomfort
- **Protective barrier:** sterile covering acts as a mechanical barrier during initial care
- **Soft non-woven carrier:** conforms comfortably for rapid, even coverage
- Low-adherent contact: designed for gentle removal to support reassessment
- Water soluble gel: rinses off with water to simplify follow-up care
- Single-use hygiene: sterile, one-time application supports good practice
- Clear storage guidance: keep dry and within 0°C-30°C for product integrity
