**PRODUCT DESCRIPTION**

AeroBurn Burn Gel Spray is a ready-to-use, non-aerosol hydrogel designed for calm, confident first aid when minor burns, scalds and sunburn occur. The pump action delivers a fine, even layer without rubbing or direct contact, supporting hygienic, touch-minimised application across workplaces, schools, vehicles and homes. The clear gel sits comfortably on the skin so the area remains visible during observation and care.

The formulation is water-soluble, allowing the gel to be rinsed away with water whenever reassessment or fresh coverage is required. This makes it practical for incident response where fast decisions and simple clean-ups matter. The convenient spray format also helps reach awkward areas such as shoulders, neck and forearms, and the non-pressurised bottle is a practical choice for first aid kits and safety stations.

The hydrogel base combines propylene glycol, glycerine, silicone emulsion and a carbomer system to form a smooth, skin-friendly gel

that spreads evenly and stays in place. It is intended for minor burns only and is suitable for general first aid environments where a cooling, soothing layer helps support comfort while further care is arranged. The streamlined design and intuitive use make it a dependable addition to everyday and occupational first aid arrangements.

From family kitchens and weekend BBQs to workshops and outdoor activities, AeroBurn Burn Gel Spray brings together ease of use, clear coverage and convenient clean-up. Keep one on hand to help manage unexpected heat-related incidents quickly and effectively, wherever people live, learn and work.

- **Hygienic spray application:** touch-minimised, non-aerosol pump for quick, even coverage.
- **Cooling comfort:** soothing hydrogel designed for minor burns, scalds and sunburn.
- **Water-soluble:** rinses away easily to reassess and reapply fresh gel.
- **Clear gel:** maintains visibility of the affected area during care.
- **Portable format:** practical for first aid kits, vehicles and facilities.

This burn treatment comes in a convenient spray format that delivers a fine, even mist over the affected area, helping avoid direct contact with tender skin while still providing thorough coverage.

This option provides a single 50 mL pump bottle, an ideal size for household first aid kits, workplace cabinets and travel bags while still offering generous spray-on coverage for minor burns and sunburn.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
