**PRODUCT DESCRIPTION**

AeroBurn Burn Gel is a topical hydrogel designed for immediate first aid care of minor burns, scalds and sunburn. The clear, water-based formula spreads easily to cover the affected area and delivers rapid cooling comfort. With a high water content, the gel helps rehydrate the skin's surface while creating a soothing barrier from external contamination. Compact, tamper-evident packaging and clear on-pack directions support fast application in time-critical situations across workplaces, vehicles and home first aid kits.

The formulation is water soluble, allowing simple rinsing with water when it is time to reassess or redress the burn. Clear usage guidance printed on the pack (apply generously, do not rub, allow to cool for 30 minutes, repeat if necessary) makes it suitable for bystanders and trained responders alike.

Packaging carries internationally recognised handling symbols including do not reuse and recycling indicators on outer cartons, supporting safe single-use practice and responsible disposal. Ingredient disclosure (including propylene glycol and glycerine) and

manufacturer/sponsor details are present to aid compliance and traceability. The range is presented in portable formats that suit immediate point-of-injury care and replenishment programs.

- **Rapid cooling comfort:** helps ease the sensation of heat from minor burns and scalds
- **High water content:** rehydrates the burn surface and supports a soothing micro-environment
- **Water soluble:** rinses off easily with water for reassessment or reapplication
- **Clear directions:** straightforward steps support correct use in first aid settings
- **Portable packaging:** compact, tamper-evident packs suited to kits and on-the-go care
- **Kit friendly:** appropriate for workplaces, vehicles and home first aid stations

**Sachet 3.5 g** provides a hygienic, single-use portion for immediate application. The compact pouch fits easily in first aid kits, vehicles and travel bags, supporting quick response at point of injury.

Supplied as a **single unit**, ideal for replacing used items in first aid kits and for individual purchase without committing to bulk quantities.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
