

ADDITIONAL INFORMATION

Weight	0.182 kg
Dimensions	5 × 17 × 5 cm
Carton Qty	24
Pricing Unit	Unit/1
Size	200ml
Min Order Qty	12
ARTG ID	236796
GMDN Code	46557
Medical Device Class	Class 1
UNSPSC Code	42151912
Tax Schedule	Taxable
Location	AU-Cameron Dr
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No

PRODUCT DESCRIPTION

AEROCOOL Instant Cooling Spray delivers fast, targeted cooling for sprains, strains and inflammation on unbroken skin. The 200 mL aerosol is ready for immediate use—no pre-chilling or freezing required—and is designed for convenient on-the-spot application across sports fields, workplaces and mobile first aid settings. A brief spray provides a soothing cooling effect to surface and underlying tissues to help reduce pain and swelling after activity or minor soft-tissue injuries.

Formulated as a skin coolant containing denatured ethanol, the spray is supplied in a compact can that fits neatly in first aid kits and bags. Simple operation makes it suitable for trained first aiders and responsible adults: hold the can upright and spray from 15–20 cm for 3–5 seconds, allowing the area to re-warm between applications. For short-term use only and for external use on intact skin.

Made for reliability in the field, the can format supports quick access, controlled coverage and repeat applications as required (up to three times with 30-second intervals). The portable design and straightforward directions help teams respond consistently during sport, travel and routine workplace incidents where cooling is indicated by organisational first aid protocols.

- **Fast, effective cooling:** delivers quick relief for sprains, strains and inflammation.
- **Ready to use:** no pre-chilling or freezing required.
- **Compact 200 mL can:** ideal for first aid kits, bags and field response.
- **Simple spray application:** 15–20 cm for 3–5 seconds, repeat if needed.
- **External use only:** suitable for unbroken skin, short-term use.
- **Workplace and sport ready:** convenient for on-the-go treatment.

The 200 mL aerosol can offers multiple applications in a compact, portable format—ideal for first aid kits, sports bags and workplace cabinets where fast, targeted cooling is required.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
