### PRODUCT DESCRIPTION

AEROCREPE Medium Cotton Crepe Bandage is designed to provide dependable support and dressing retention for everyday first aid needs. Made from soft cotton crepe, it offers a comfortable feel against the skin while delivering consistent compression to help support joints and soft tissue injuries. The medium weight construction makes it suitable for light to medium injury support, ideal for use at home, in workplaces, schools, sports clubs, and first aid rooms.

The woven crepe structure allows the bandage to conform easily around curves and contours of the body, such as wrists, elbows,

knees, and ankles. This helps maintain a secure, even wrap that stays in place during normal movement. The fabric stretches to accommodate swelling and activity, then recovers to provide ongoing gentle pressure, supporting comfort over extended wear.

The cotton material is breathable to help reduce heat build-up under the bandage. Air can circulate through the crepe weave, which can be especially important when the bandage is used to hold primary dressings or gauze in place. The bandage is also non-sterile and white in colour, supporting a clean, professional appearance in both clinical and household settings.

AEROCREPE Medium Cotton Crepe Bandage is well suited to securing wound dressings, protecting gauze pads, and reinforcing splints or supports applied by a healthcare professional. It can be used as part of general first aid kits, workplace compliance kits, sports bags, and home medicine cabinets so a supportive wrap is always available when needed. The easy handling of the crepe fabric helps users achieve a neat, consistent wrap, whether they are experienced first aiders or occasional users.

This bandage family is also a practical choice for everyday incidents such as minor sprains, strains, and overuse discomfort where controlled compression and support may be recommended. Its combination of softness, flexibility, and reliable hold makes it a versatile option for a wide range of care situations, from simple dressing retention through to more structured compression techniques performed under appropriate guidance.

- **Medium weight support:** suitable for light to medium injury support and dressing retention.
- **Breathable cotton crepe:** helps maintain comfort when worn for extended periods.
- **Conforming stretch fabric:** wraps smoothly around limbs and joints for secure placement.
- **Soft and comfortable:** gentle against skin for everyday first aid use.
- **Ideal for home and workplace kits:** versatile bandage for a wide range of support needs.

The **Size 10 cm x 4 m** option offers generous coverage across larger areas such as lower legs, thighs, or upper arms while still providing balanced medium weight support and reliable dressing retention.

Supplied as **12 wraps**, this configuration is suited to topping up home, workplace, and sports first aid kits, providing enough medium cotton crepe bandages for multiple applications without frequent reordering.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
