AEROFOAM NON-ADHESIVE FOAM DRESSING 10 X 10CM BOX/10

AFD010

Key Features:

- **Gentle on Skin:** Made with a soft, non-adhesive material that reduces pain and trauma during dressing changes, making it ideal for sensitive skin.
- **Highly Absorbent:** The open-cell structure of the foam ensures superior fluid handling capacity, reducing the risk of maceration.
- **Thermal Insulation:** Maintains a moist wound environment and provides thermal insulation to protect wounds from external contaminants and retain the body's natural healing warmth.
- **Breathable Design:** The semi-permeable outer layer allows for an effective vapor transmission rate, ensuring that excess moisture is wicked away while retaining the essential moisture for wound healing.
- **Versatile Application:** Suitable for a range of wounds including pressure ulcers, diabetic ulcers, burns, grafts, and more.
- **Easy to Shape:** Can be cut to fit various wound shapes and sizes without unraveling or shedding.

Safety Considerations: For external use only. Always read the label and follow the directions for use.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
