PRODUCT DESCRIPTION

Engineered for dependable compression and strong support, the AeroForm Heavyweight Conforming Bandage is a cost-effective staple for first aid rooms, workplace kits, and professional responders. Built to conform closely to body contours, it helps stabilise soft-tissue injuries while keeping dressings and padding securely in place. The fabric construction provides a firm, reassuring wrap that is comfortable for extended wear and easy to handle during application.

Designed for training and real-world response alike, this bandage offers the robust performance expected of a heavyweight

conforming wrap. It is recommended for sprains and strains where targeted compression and support are required, and it can be used as part of pressure-immobilisation techniques in first aid protocols for snake bite. The non-sterile, single-use format makes it suitable for holding sterile dressings without adding bulk at the wound site.

An easy-open wrapper speeds access when time matters, allowing quick deployment while maintaining pack integrity in storage. The durable yet breathable fabric aids comfort and helps the bandage sit smoothly under clothing or protective gear, while the conforming weave assists with neat, gap-free layers over joints and tapered limbs.

- **Heavyweight conforming design:** delivers firm compression and reliable support for soft-tissue injuries
- **Comfortable, breathable fabric:** helps reduce bulk and maintain wearer comfort during movement
- **Non-sterile, single use:** ideal for securing sterile pads and dressings in place
- **Easy-open wrapper:** quick access tab helps accelerate response in time-critical situations
- **Secure hold on contours:** conforming weave helps create smooth, consistent layers
- **Clear labelling:** size and usage cues simplify rapid product selection
- **First aid ready:** a practical choice for kits across workplaces, vehicles, and community settings

Size 5 cm x 4 m delivers focused, controllable compression that's ideal for wrists, forearms and ankles while maintaining a neat wrap on tapered limbs.

Supplied as a **10 cm x 4 m** heavyweight conforming bandage, ideal for efficient limb coverage and firm, even compression during first aid. Broad width helps reduce wrap time while maintaining a tidy, supportive finish.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
