

ADDITIONAL INFORMATION

Weight	0.5 kg
Dimensions	22 × 4 × 26 cm
Carton Qty	20
Pricing Unit	Wrap/12
Size	10cm x 4.5M
Min Order Qty	1
ARTG ID	236809
GMDN Code	10274
Medical Device Class	Class 1
UNSPSC Code	42311506
Tax Schedule	Taxable
Item Length	450
Item Width	10
Item Measurement Unit	cm
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No

PRODUCT DESCRIPTION

AeroForm Premium Heavyweight Conforming is a specialised compression bandage range designed to deliver firm, even support to limbs and joints. The heavy weight construction combines elasticated fibres with a closely woven structure so the bandage conforms smoothly to body contours. This helps it wrap comfortably around ankles, knees, wrists, elbows and other areas that need reliable compression without excessive bulk. The design is suited to securing dressings and padding where consistent pressure and dependable retention are important in everyday first aid care.

The flexible fabric stretches and moulds to curves and tapers, helping to minimise gaps, ridges and bunching under clothing or footwear. Once applied, the bandage sits low profile on the limb while maintaining a stable, supportive feel so users can continue routine tasks at home, at work or during light activity. The material is soft against the skin and can be layered to build the level of compression recommended by a healthcare professional for sprains, strains and general soft tissue injuries.

AeroForm Premium Heavyweight Conforming bandages are non sterile and intended for general first aid use where secure retention and extra firm support are required. The compressive properties help maintain coverage over padded dressings and compresses, supporting comfort and confidence between checks. The tan flesh tone offers a discreet appearance that blends with skin and clothing so users can feel more at ease wearing the bandage throughout the day, whether in household settings, workplaces, schools, clinics or sports environments.

The combination of strong yet flexible construction, good conformability and a comfortable finish makes this bandage range a practical choice wherever dependable compression is needed. It can be shaped closely to hands, feet and lower limbs, helping to reduce pressure points while still providing the firmness required to support injured areas. This balance of performance and comfort supports effective first aid management for a wide variety of everyday situations.

- **Extra firm support:** heavy weight construction helps stabilise joints and soft tissue injuries.
- **Excellent conforming properties:** elasticated weave stretches and moulds to body contours for a secure fit.
- **Comfortable feel:** soft material is suitable for extended wear in home, work and sports settings.
- **Secure retention:** helps hold primary dressings and padding in place during normal activity.
- **Discreet look:** tan flesh tone blends with skin for low profile coverage under clothing.

The **Size 10 cm x 4.5 m** option offers generous coverage for limbs and joints, allowing the bandage to wrap securely around ankles, knees and lower legs while maintaining firm, even compression and a smooth, low profile finish.

Each wrap measures **10 cm x 4.5 m**, offering broad coverage for limbs and joints while still allowing controlled layering, so users can build the level of compression suited to their needs.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
