PRODUCT DESCRIPTION

The AEROLEARN Placebo Inhaler from Aero Healthcare is a non-medicated inhaler designed to provide a medically accurate replication for product training and learning scenarios.

Designed to provide asthma sufferers and other inhaler users with a training device to learn how to accurately use the inhaler before trying with a medicated device.

For training purposes only, these products are proven to enhance simulation-based training and improve student retention. To use on training manikins only.

- Perfect for clinical training for patients new to inhalers.
- Train hand and breath coordination prior to using a medicated inhaler.

- Contains aerosol propellant, for training use only.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
