Is Dangerous Good	No

PRODUCT DESCRIPTION

AeroPad Non-Adherent Eye Pads provide gentle, hygienic coverage for the periocular area when protection and cushioning are required. Each pad combines a soft, absorbent core with a smooth, double-sided non-adherent contact layer that resists sticking to skin and hair. The oval, contoured profile sits comfortably over the eye and is easily secured with fixation tape or a light bandage, supporting clean, undisturbed coverage while care is assessed or delivered in first aid and clinical settings.

The construction is lightweight yet effective, designed to manage minor weeping so the area stays cleaner between observations. A

AEROPAD NON-ADHERENT EYE PADS 5.5 X 7.7CM BOX/50

AEP1S

low-adherence surface helps reduce trauma during pad changes and supports consistent technique across different users. Every pad is individually packaged and sterile until opened, maintaining cleanliness for dependable readiness in workplaces, schools, households, community care and emergency response kits.

Engineered for straightforward handling, AeroPad is compatible with common fixation tapes and bandages found in first aid kits. The soft edges feel unobtrusive during short-term wear, while the non-adherent layer on both sides simplifies placement from either face. Latex-free materials support use across mixed environments where sensitivity considerations matter. Whether used after minor incidents, during assessments, or while awaiting further medical review, AeroPad delivers reliable, comfortable eye area coverage that helps maintain hygiene and confidence.

- **Double-sided non-adherent layer:** minimises sticking for gentler changes.
- **Absorbent inner core:** helps manage light exudate to keep the area cleaner.
- **Sterile and individually packed:** maintained cleanliness until opened.
- **Comfortable oval profile:** contours to the eye area for secure taping.

Supplied in **a box of 50** oval pads sized 5.5 cm x 7.7 cm. The double-sided non-adherent contact layer and absorbent core support gentle changes and tidy coverage, ideal for first aid kits in workplaces, schools, vehicles and homes.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
