## PRODUCT DESCRIPTION

AeroPlast Plastic Bandages are meticulously designed to offer superior wound protection and comfort, making them an essential choice for both healthcare professionals and everyday users. These bandages are crafted with a focus on quality and innovation, ensuring they meet the highest standards of wound care. At the heart of these bandages is the SupaSorb Wound Pad, which provides exceptional wound management by effectively absorbing blood and exudates into its unique pockets. This feature minimizes the need for frequent dressing changes, keeping the wound clean and protected while reducing discomfort. The non-adherent film of the pad ensures that dressing changes are painless, making it suitable for all ages and skin types. The SupaBond Adhesive is another standout feature, engineered for unparalleled adhesion. It ensures a secure fit across the wound site, preventing the bandage from lifting or curling at the edges, even during active movements. This adhesive strength is crucial for maintaining the integrity of the bandage, especially in dynamic environments. AeroPlast Plastic Bandages are made from materials that conform to the body's natural contours, allowing for complete freedom of movement. This flexibility makes them ideal for use on joints and other areas that require frequent motion. Additionally, the bandages are air permeable, allowing the skin and wound to breathe, promoting faster healing. Hypoallergenic and latex-free, these bandages are gentle on sensitive skin, reducing the risk of allergic reactions. The washproof design ensures that the bandages remain effective even when exposed to water, making them perfect for everyday use, whether at home, school, or during outdoor activities. Available in various sizes, including the X-Wide Strip measuring 7.5 x 2.5cm, these bandages provide ample coverage for larger wounds. Each box contains 100 bandages, ensuring an adequate supply for any situation. The packaging is designed for easy dispensing, with clear instructions for use. Simply apply the bandage to clean, dry skin, press the edges down firmly, and change daily or as needed. These single-use bandages should be stored in a cool, dry place to maintain their

effectiveness. Manufactured by Aero Healthcare, a trusted name in wound care, these bandages are CE and UKCA certified, ensuring they meet high standards of quality and safety. AeroPlast Plastic Bandages are an excellent choice for anyone seeking effective and comfortable wound protection.

The AeroPlast Plastic X-Wide Strip 7.5 x 2.5cm Box/100 provides a convenient and cost-effective solution for wound care. Each box contains 100 bandages, ensuring an adequate supply for any situation. The washproof design ensures that the bandages remain intact even when exposed to water, making them perfect for everyday use. These single-use bandages should be stored in a cool, dry place to maintain their effectiveness.

#### **Contraindications and Precautions**

Change dressing daily or more often according to the condition of the wound. As with all adhesive products apply and remove carefully from sensitive or fragile skin. Seek medical advice immediately for all serious wounds and burns. If redness or discomfort occurs, discontinue use and consult a physician.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.

**AEROPLAST Extra Wide Strip**
