PRODUCT DESCRIPTION

AEROPROBE Double-Ended Eye Wipe is a compact instrument designed to help remove superficial debris around the eye area with precise, gentle control. The tool features two smooth wiping tips so users can work from either end without changing instruments, supporting quick responses in busy environments. At 11 cm in length, it balances reach and manoeuvrability for steady, pencil-style handling.

Smooth rubber wiping tips offer a non-fibrous surface that won't shed strands, helping reduce irritation during delicate tasks near the eyelid and lash line. The streamlined shaft supports confident grip and fine motor control, making the device suitable for first aid kits, workplace eye care stations, general practice, and triage use.

Blue-white contrast at the ends enhances visibility against skin and lashes, aiding accurate placement in both bright and low-light conditions. The clean, simple construction integrates easily into instrument trays and first aid modules, and works well alongside sterile saline and gauze when responding to minor eye incidents in workplaces, schools, hospitality, and field settings.

- **Double-ended convenience:** two wiping tips for efficient use.
- **Compact 11 cm control:** steady, pencil-style handling.
- **Smooth rubber tips:** non-fibrous surfaces for gentle wiping.
- **High-visibility ends:** blue-white contrast aids accurate placement.
- **Kit-ready design:** ideal for first aid, workplace, and clinical use.

Features a compact **11 cm length** for pencil-style control, ideal for precise, gentle wiping during minor eye care tasks.

AEROPROBE DOUBLE-ENDED EYE WIPE 11CM BOX/100
