

ADDITIONAL INFORMATION

Weight	4.94 kg
Dimensions	28 × 17 × 26 cm
Carton Qty	2
Pricing Unit	Bag/100
Size	1180mm x 580mm x 4.5mm
Min Order Qty	1
ARTG ID	236926
GMDN Code	10416
Medical Device Class	Class 1
UNSPSC Code	42171701
Tax Schedule	Taxable
Item Length	118
Item Width	58
Item Height	0.45
Item Measurement Unit	cm
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No
Shelf Life (Months)	60
Warranty Period (Months)	12

PRODUCT DESCRIPTION

The AeroRescue Thermal Blanket is designed to help maintain body warmth in emergencies where temperature control is critical. Made from reflective foil material, it helps reduce further heat loss by bouncing a high proportion of body heat back toward the user. This makes it a practical addition to first aid kits in workplaces, vehicles, schools, sports clubs and home emergency supplies, where unexpected exposure to cold or shock can occur.

The blanket is sized to fully cover an adult, providing wraparound coverage from shoulders to feet. The lightweight, compact design folds down to a small pack, so it is easy to store in limited spaces such as glove boxes, backpacks, kit bags and emergency response kits. Despite its low bulk, the material offers a sturdy barrier against wind and rain, helping shield the user from harsh environmental conditions while assistance is arranged.

By helping to reduce the effects of cold environments and air movement, the AeroRescue Thermal Blanket supports comfort and reassurance for a person who may be feeling vulnerable after an incident. The bright, metallic finish also provides good visibility, which can assist responders in quickly locating the person in low-light or remote settings. Suitable for a wide range of emergencies, from outdoor mishaps to roadside incidents, it is a simple tool that can make a meaningful difference to user comfort while awaiting further care.

- **Reflective design:** helps retain body warmth by reflecting heat back toward the user.
- **All-weather protection:** creates a barrier against wind and light moisture in exposed environments.
- **Generous coverage:** large size is suitable for most adults in lying or seated positions.
- **Compact and lightweight:** folds to a small pack for easy inclusion in first aid kits and go-bags.
- **Emergency ready:** ideal for roadside incidents, outdoor activities and general first aid preparedness.

The AeroRescue Thermal Blanket is a purpose-designed emergency blanket that helps limit further body heat loss when someone is exposed to cold conditions or experiencing shock. Constructed from reflective foil material, it directs a high proportion of radiated body heat back toward the user to support warmth. This makes it a valuable component of first aid preparations in workplaces, vehicles, schools, sports clubs and homes where unexpected incidents can occur at any time.

","

The blanket is sized to comfortably cover an adult, offering wraparound protection for the torso, legs and feet in lying or seated positions. Its thin, flexible material creates a barrier against wind and light moisture, improving comfort while help is organised. Despite the generous coverage, the blanket is light and compact when folded, so it fits easily in first aid kits, glove boxes, hiking packs and emergency response bags without adding significant bulk or weight.

","

By helping to stabilise body temperature in challenging environments, the AeroRescue Thermal Blanket can provide reassurance to both the person affected and those assisting them. The bright metallic finish improves visibility, which can assist responders in quickly locating a person in low light or remote settings. Suitable for roadside incidents, outdoor adventures and general emergency planning, it is a practical tool for anyone responsible for safety and care.

- **Heat reflective surface:** helps retain body warmth by reflecting emitted heat.
- **Environmental shield:** offers a barrier against wind and light rain in exposed areas.
- **Adult-sized coverage:** large format supports full-body wrapping for most users.
- **Portable design:** lightweight and compact for easy storage in first aid kits and vehicles.
- **Versatile emergency use:** suitable for roadside events, outdoor activities and general preparedness.
