**PRODUCT DESCRIPTION**

AeroScar Silicone Scar Sheets are medical-grade silicone dressings developed for the temporary management of raised scars. Designed for hypertrophic and keloid scars on fully healed skin, they provide a smooth, flexible layer that sits comfortably over the scar area. By helping to maintain hydration and gentle pressure on the skin surface, these sheets support a flatter, softer-looking scar over time while still allowing natural movement in everyday life.

Each sheet is made from soft, elastic silicone that conforms closely to body contours such as the abdomen, limbs, and other common surgical or injury sites. The transparent finish keeps the dressing discreet under clothing, so users can feel more confident wearing it throughout daily activities, at work, or during exercise. The smooth texture minimises friction against fabrics, helping the sheet stay

comfortable during prolonged wear.

The silicone surface adheres directly to the skin without additional tapes in most situations, allowing quick placement and removal. The sheets can be cut to size, making it easy to customise the shape to match individual scars, including linear surgical lines and irregular areas. This tailored fit helps maximise skin contact and reduces lifting at the edges. The material is latex free and gentle on sensitive skin, supporting repeat application as part of an ongoing scar management routine.

AeroScar Silicone Scar Sheets are suitable for a wide range of scar types where the wound has completely closed and the surrounding skin is healthy. They are particularly suited to scars following surgical procedures, caesarean sections, injuries, or burns once fully healed. The reusable design offers a practical option for people seeking a non-invasive way to manage the appearance of scars while maintaining normal daily routines.

- **Medical-grade silicone:** Soft, elastic material designed for comfortable scar management.
- **Customisable fit:** Sheets can be cut to match individual scar shapes and lengths.
- **Discreet appearance:** Transparent finish is low profile under clothing.
- **Skin friendly:** Gentle, latex free construction designed for repeated wear.
- **Non-invasive option:** Supports daily scar care without complex equipment.

The **7.4 cm x 4.4 cm size** offers focused coverage for many common surgical and injury scars on the abdomen or limbs, providing a comfortable, discreet silicone layer without feeling bulky on the skin.

Packaged in a **box of 10 silicone scar patches**, each measuring 7.4 cm x 4.4 cm, this option suits clinics, pharmacies and home users who want a practical supply for ongoing scar management on fully healed skin.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
