## PRODUCT DESCRIPTION

AEROSHIELD Disposable Face Shield is designed for safe, effective CPR in public, workplace, and training environments. The clear, tough vinyl barrier covers the nose and mouth while allowing visibility for correct positioning. Its practical build supports reliable ventilations without direct mouth-to-mouth contact—an essential addition to professional kits and community first aid resources.

A built-in one-way valve helps direct airflow to the patient while reducing backflow, supporting hygienic rescue breaths when seconds matter. The single-use format aligns with infection control best practice and simplifies post-event clean-up, making replenishment straightforward for organisations that value readiness and compliance.

The latex-free, hypoallergenic construction supports broad user compatibility across workplaces and public settings. Lightweight and compact, it fits easily in first aid kits, vehicles, or responder pouches so help is at hand during emergencies or drills. It is also suitable for manikin practice, helping learners build confidence with equipment that mirrors real use.

# AEROSHIELD DISPOSABLE FACE SHIELD IN SACHET BOX/10

AFS003

Whether equipping a workplace, stocking community responders, or supporting training programs, this dependable CPR barrier delivers the right balance of protection, clarity, and simplicity for rapid response.

- **One-way valve protection:** promotes hygienic rescue breaths and reduces backflow.
- **Durable vinyl film:** clear, tough barrier that conforms for accurate placement.
- **Latex-free and hypoallergenic:** suitable for diverse users and settings.
- **Single-use format:** supports infection control and easy replenishment.

**Type:** Face Shield in Sachet provides a hygienic, individually wrapped barrier that fits neatly into first aid kits and responder pouches for rapid access when needed.

Supplied as a **single disposable unit in a compact sachet**, ideal for topping up first aid kits and vehicles while keeping hygiene high and bulk waste low.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
