

ADDITIONAL INFORMATION

Weight	0.019 kg
Dimensions	1 × 6 × 6 cm
Carton Qty	250
Pricing Unit	Unit/1
Size	One Size
Min Order Qty	1
ARTG ID	236803
GMDN Code	36066
Medical Device Class	Class 1
UNSPSC Code	42272303
Tax Schedule	Non-Taxable
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No
Shelf Life (Months)	60
Warranty Period (Months)	12

PRODUCT DESCRIPTION

AEROSHIELD Key Ring CPR Face Shield is a compact, single-use barrier designed to support safer rescue breathing during cardiopulmonary resuscitation. It forms a hygienic separation between responder and patient to help reduce cross-contamination while allowing clear airflow consistent with barrier devices. The lightweight shield arrives folded in a durable pouch with a keyring, keeping it ready on keys, lanyards, bags or first aid kits so responders can access it quickly. The streamlined format fits preparedness plans for workplaces, public venues and community responders who need a practical way to carry a barrier without bulk. With no complex setup, it can be deployed fast to support assisted ventilation during an emergency while maintaining a protective interface.

Built for everyday portability, the one-size design offers a practical option across common environments. It complements first aid kits in offices, vehicles, schools, hospitality and sport, and it suits mobile responders who value reliable access in the field. The clear, low-profile shield supports visual monitoring of technique so users can focus on positioning and airway management without distractions from a bulky mask. It also serves as a training aid on CPR manikins, enabling trainers and learners to practise rescue breaths while maintaining a cleaner practice environment. The robust pouch helps protect the shield from wear inside bags and pockets, so it stays ready for unexpected moments when a simple barrier can make a meaningful difference.

Delivering reliability and speed of access, AEROSHIELD helps responders act decisively in the moments that matter. The pocket-ready keyring format is designed to be on hand when needed most, whether clipped to everyday carry, stored in vehicle kits, or placed alongside other first aid essentials. The shield integrates smoothly with broader resuscitation setups used by first aiders, security teams and community volunteers, and supports consistent practice during drills and real-world responses. Whether kept in a glovebox, clip-on pouch or workplace cabinet, it is a sensible addition to preparedness kits for environments where people gather and require practical solutions for assisted ventilation.

- **Single-use hygiene barrier:** helps reduce cross-contamination during rescue breathing.
- **Everyday portability:** compact keyring design for bags or kits.
- **Training friendly:** suitable for use on CPR manikins.
- **One-size readiness:** practical for workplaces, vehicles and community sport.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
