Is Dangerous Good No

## **PRODUCT DESCRIPTION**

AeroShield Nitrile Finger Cots provide dependable fingertip protection for clinical, workplace and first aid environments where hygiene and precision matter. Made from durable nitrile, they combine flexibility with puncture resistance to create a comfortable barrier that supports extended wear. An ambidextrous, anatomically shaped design helps each cot fit naturally on either hand, streamlining application during busy shifts and helping maintain dexterity for delicate tasks.

The powder-free surface delivers a confident wet and dry grip, aiding accurate handling of instruments, components and dressings. The high-visibility blue colour makes damage easier to spot, supporting quick replacement when required. Anti-static properties broaden use to electronics handling and other static-sensitive settings. Each cot is pre-rolled to speed application when time is critical, from first aid response to routine medical examinations, laboratory work and food preparation.

Engineered for reliability and comfort, AeroShield Nitrile Finger Cots are a practical addition to professional kits and workplace safety programs, helping maintain clean touchpoints while allowing precise control. Their consistent performance supports confident use across healthcare, light industrial, hospitality and education settings.

- **Powder-free wet/dry grip:** secure handling and procedural control.
- Durable nitrile barrier: flexible protection with puncture resistance.
- Blue for visibility: easier split detection during use.
- Pre-rolled and ambidextrous: quick, comfortable application on either hand.

## AEROSHIELD MEDIUM NITRILE FINGER COTS BOX/100

**ASN100-M** 

• Anti-static: suitable for electronics and static-sensitive environments.

The **Medium size** option balances a snug fit with easy donning to support reliable control during delicate tasks. It helps maintain dexterity while providing comfortable coverage for extended use in clinical and workplace settings.

Packaged in **boxes of 100** to streamline replenishment for clinics, workplaces and kits. The count supports frequent use while maintaining consistency across shifts and training sessions.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
