Tax Schedule	Taxable
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No

PRODUCT DESCRIPTION

AEROSWAB Cotton Balls deliver soft, dependable support for everyday first aid and skin preparation. Made from 100% cotton, they are gentle on delicate areas while offering efficient pickup of fluids and debris during cleansing. The non-sterile design is ideal for pairing with antiseptic or saline, helping maintain a cleaner field as you prepare the site for dressings or topical applications.

Each ball is formed for consistent handling, allowing easy placement with tweezers or gloved fingers. The uniform structure keeps its body when damp, so you can swab, dab and apply solutions with control. Suitable for clinics, workplaces, schools and home kits, these cotton balls provide a practical option for routine care tasks across a wide range of environments.

Use AEROSWAB for wound cleansing, dabbing after injections, applying antiseptics and ointments, and general skin care preparation. The single-use format supports hygienic practice and quick changeovers between tasks—just use and dispose. Durable, soft and versatile, they are a simple choice for first aid essentials and everyday clinical workflows.

- **100% cotton softness:** gentle contact on skin for cleansing and application.
- **Efficient absorbency:** picks up fluids to help keep the area cleaner.
- **Non-sterile, single use:** practical for routine first aid and hygiene.
- **Consistent ball shape:** easy, controlled handling with fingers or forceps.
- **Works with saline or antiseptic:** versatile across preparation steps.

The **Size: Small** option supports precise cleansing and targeted application on delicate areas, helping reduce waste and maintain control during routine first aid and skin preparation tasks.

Supplied in a **bag of 100** to streamline restocking of first aid kits and workplace stations, supporting multiple cleansing and application tasks while keeping changeovers efficient.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
