PRODUCT DESCRIPTION

AEROSWAB Applicator delivers reliable performance for everyday clinical tasks, first aid rooms, and training environments. Each applicator combines a premium quality cotton tip with a sturdy wooden/bamboo stick to provide controlled handling and consistent absorbency. The 15 cm length supports reach and visibility when applying ointments, cleansing around dressings, or placing solutions with care. A single-ended design focuses precision at the working tip while keeping the opposite end clear for confident grip and manoeuvrability.

Materials are selected for dependable function. Soft cotton shapes neatly to contours while the rigid stick helps maintain direction and pressure during delicate work. Non-sterile presentation suits general topical use and practice scenarios where sterile product is not required. The bag of 100 supports efficient restocking of clinics, first aid kits, and workplace cabinets, helping reduce interruptions to care and simplifying inventory control.

AEROSWAB Applicator sits within a broader range that includes different lengths and end types, so facilities can match the right format to the task. The focus on quality cotton and robust sticks makes these applicators a practical choice for routine procedures, swabbing tasks, and product application across healthcare, education, and workplace settings.

AEROSWAB 7.5CM BAMBOO DOUBLE END APPLICATORS BAG/100

ACA750

- **Premium cotton tip:** consistent absorbency and smooth application.
- Sturdy 15 cm stick: improved reach and control for precise placement.
