## PRODUCT DESCRIPTION

AeroTape Elastic Fabric Adhesive Fixation Tape is a versatile and comfortable tape designed for use in medical and sports settings. It is made from a flexible and breathable elastic fabric that conforms to the body, allowing for a full range of motion while providing support and stability. The adhesive is strong and durable, yet gentle on the skin, ensuring that the tape stays securely in place without causing irritation or pain. While being gentle on even the most sensitive skin, it can be easily removed without causing irritation or pain. This tape can be used to secure bandages, IVs, tubing, and other medical devices.

The 5cm x 5m tape provides a larger-sized Elastic Fabric Adhesive Tape for securely fixating items.
