**PRODUCT DESCRIPTION**

AeroTape Sensitive Silicone Tape is a gentle adhesive medical tape designed for secure fixation on delicate or easily irritated skin. It is suitable for applications where frequent dressing changes are needed, helping to keep bandages, gauze and medical devices in place while minimising discomfort during removal. The soft, flexible backing conforms easily to body contours so it can be used on awkward areas without digging in or restricting movement.

The tape uses a medical grade silicone adhesive that adheres reliably yet peels away with less pull on the skin surface. This helps reduce the risk of redness and irritation, especially for people with fragile, paediatric or ageing skin. The low irritant, hypoallergenic properties support ongoing use in clinical settings and at home, where comfort and skin integrity are important.

AeroTape Sensitive Silicone Tape tears by hand for quick, simple application. The easy-tear construction allows users to cut the length they need without scissors, saving time during dressing changes. Once applied, the tape lays flat with smooth edges to help reduce rolling and catching on clothing or bedding.

This tape is ideal for securing light dressings, fixation pads, and small medical devices in hospitals, clinics, aged care facilities and home care. It is latex free, providing an option for users who need to avoid natural rubber latex. The combination of gentle adhesion, flexibility and clean removal makes it a practical choice wherever skin-friendly fixation is required.

- **Gentle silicone adhesive:** designed for sensitive or fragile skin.
- **Hypoallergenic and latex free:** suitable for users with sensitivities.
- **Easy-tear design:** can be torn by hand for fast application.
- **Flexible backing:** conforms comfortably to body contours.
- **Clean removal:** helps reduce discomfort during frequent changes.

>>>>,,

The silicone adhesive formulation offers a gentle option for users who need reliable fixation with less pull on delicate or easily irritated skin.

The 2.5 cm x 3 m roll length provides ample tape for securing light dressings and pads, while remaining compact enough to fit easily into first aid kits, clinical trolleys or home care supplies.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
