## PRODUCT DESCRIPTION

AeroWash Sodium Chloride Eyewash Ampoule is a sterile normal saline solution designed to gently flush the eyes and rinse debris from minor wounds. The clear 0.9% sodium chloride solution is isotonic with body fluids, so it is suitable for sensitive areas where a gentle, balanced rinse is important. It supports effective irrigation when clean water is not immediately available, making it a practical choice for workplaces, clinics, first aid kits and on-the-go personal safety.

The ampoule format is compact and lightweight, so it fits easily into first aid kits, response bags and personal lockers. Each sealed unit is intended for single use, helping maintain hygiene and reducing the risk of cross-contamination. The twist-off or tear-off opening is designed for quick access, allowing fast response when dust, dirt or foreign particles need to be rinsed away from the eye or surrounding area.

AeroWash is suitable for rinsing the ocular area during medical procedures and for general eyewash needs in industrial, educational

and home environments. It can also be used to irrigate minor cuts and grazes to help remove loose debris before further care is provided. Normal saline is widely trusted for cleansing because it does not contain added preservatives or active medicines, making it a versatile rinse option for a broad range of users.

The transparent ampoule allows easy visual checking of the solution, while printed labelling clearly identifies the product as eyewash and wound irrigation normal saline. The small format encourages users to keep multiple ampoules in distributed locations such as workshop stations, vehicles, classrooms and site offices so that irrigation is close at hand whenever needed.

- **Gentle normal saline solution:** 0.9% sodium chloride suitable for eye and wound irrigation.
- **Single-use sterile ampoule:** sealed unit helps support hygienic, contamination-free rinsing.
- **Quick-access opening:** twist-off or tear-off top enables fast response in urgent situations.
- **Compact and portable:** lightweight design fits easily into first aid kits and emergency grab bags.
- **Versatile applications:** useful for rinsing eyes and cleansing minor wounds in many settings.

The **15 ml size** offers a generous single-use volume for thorough eye irrigation while remaining compact enough to fit easily into first aid kits, vehicles and personal carry bags.

Supplied as a **single ampoule**, this option is ideal when an individual refill or sample unit is needed, offering one full 15 ml dose of normal saline for a complete irrigation event.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
