PRODUCT DESCRIPTION

AeroWound Silicone Wound Contact Dressing boast impressive technologies for less pain contact layer. Using silicone adhesion, minimal trauma can be achieved during dressing changes. Engineered with the patient's comfort in mind, this dressing promotes a better healing environment.

Features:

1. Non-Adherent Surface: Made with medical-grade silicone, our dressing minimises the risk of adhesion to the wound, ensuring

AWSC10

pain-free dressing changes.

- 2. **Gentle on Skin:** Ideal for those with sensitive or fragile skin, the silicone material reduces the potential for skin irritation or allergic reactions.
- 3. **Translucent Design:** The see-through quality of the dressing allows for easy monitoring of the wound without the need for frequent dressing removal.
- 4. Flexible and Conformable: Adapts to body contours, ensuring a snug fit while allowing the patient to move freely.
- 5. **Breathable:** Promotes a moist wound environment while allowing excess moisture to evaporate, thus reducing the risk of maceration.
- 6. **Protective Barrier:** Acts as a barrier to external contaminants, reducing the risk of infection.
- 7. **Versatile:** Suitable for a variety of wound types, including post-operative wounds, minor burns, abrasions, and lacerations.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
