## PRODUCT DESCRIPTION

The AeroKit NAVIGATOR Scale F Marine First Aid Kit Refill is designed to replenish comprehensive marine first aid kits so they remain ready for emergencies at sea. It supports vessel operators who must maintain compliance with marine safety requirements while ensuring crew and passengers have access to a broad range of first aid items. This refill focuses on wound care, bandaging, personal protection and basic diagnostic tools so common onboard injuries and sudden illnesses can be managed promptly and confidently.

This marine-focused refill is suitable for commercial and charter vessels that need reliable first aid coverage on coastal and offshore routes. A wide selection of dressings, bandages, antiseptic wipes and clinical disposables helps users respond to cuts, grazes, burns, sprains and minor eye injuries, as well as manage bleeding and protect wounds until professional medical support is available. Gloves, masks and other barrier products support hygiene when treating multiple people in confined spaces such as cabins or engine rooms.

The NAVIGATOR Scale F Marine First Aid Kit Refill is also a practical choice for larger private boats that cruise with families, tour groups or work crews. Keeping a dedicated refill on hand makes it faster to restore a depleted kit after an incident or routine use. Having well

organised marine-appropriate supplies available helps reduce downtime, supports safer operations and provides peace of mind for skippers and duty holders responsible for health and safety at sea and on inland waterways.

- **Marine ready:** tailored for the needs of working and charter vessels.
- **Compliance support:** helps maintain first aid coverage that meets marine guidelines.
- **Comprehensive refill:** restocks wound care, bandages and protection items.
- **Ideal for crews and passengers:** suited to commercial and recreational boats.
- **Easy kit restoration:** simplifies bringing a used kit back to full readiness.

This refill is tailored to Scale F marine requirements, making it suitable for vessels that need structured first aid coverage aligned with recognised marine guidelines.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
