Kits - Industry	Marine
Kits - Case	Refill
Is Dangerous Good	No

PRODUCT DESCRIPTION

The NAVIGATOR Scale G Marine First Aid Kit Refill is designed to refresh and maintain compliance for dedicated marine first aid stations on commercial and recreational vessels. It supports vessel operators who must meet NSCV Scale G requirements for classes 1D, 1E, 2D, 2E, 3D and 3E, helping ensure crew and passengers have access to essential first aid items when they are needed most. This refill consolidates a broad selection of dressings, bandages, wipes and accessories suitable for treating common onboard injuries in a busy marine environment.

Each component is selected to support effective response to cuts, grazes, sprains, minor burns and eye irritation that may occur in and around working decks, galleys and passenger areas. The refill format makes it easy to restore depleted kits after an incident, audit or scheduled safety inspection, so the main case remains fully stocked without needing to replace the entire kit. A structured layout and clearly identifiable product packaging help users quickly locate what they need in stressful situations.

This marine-focused refill is suitable for workboats, passenger vessels, charter craft and private boats that want a simple pathway to

maintain first aid readiness. It is also well suited to training providers, maritime colleges and safety organisations that regularly consume first aid supplies as part of their programs. The comprehensive content mix supports everyday first aid in the home, workplace and on the water, helping keep people safe on short coastal trips and longer voyages alike.

- **Marine compliant:** supports NSCV Scale G requirements for multiple vessel classes.
- **Comprehensive mix:** includes a wide range of wound care, bandages and accessories.
- **Refill efficiency:** restores a depleted kit without purchasing a new case.
- **Versatile use:** suitable for commercial vessels, leisure craft and general first aid.
- **Ideal for audits:** simplifies restocking after safety checks or incidents.

This marine focused configuration is aligned with NSCV Scale G, making it suitable for commercial and recreational vessels that need dedicated first aid coverage for specified classes.

Supplied as a complete refill unit for NAVIGATOR Scale G marine first aid kits, this option replaces used consumables in a single step to keep onboard and workshop first aid stations ready for use.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
