**PRODUCT DESCRIPTION**

AeroPad™ Non-Adherent Dressing is a soft, non-stick wound pad designed to protect delicate skin while offering reliable absorbency. A

# AEROPAD NON-ADHERENT DRESSING 10 X 10CM BOX/3

APD1013S

dual-sided non-adherent contact layer helps minimise trauma during dressing changes, while the cushioned inner core draws fluid away from the site to support comfort. The dressing is sterile and latex free, making it suitable for use across workplaces, schools, clinics and home first aid kits.

The pad sits comfortably beneath securement such as film dressings, paper tapes or conforming bandages, allowing teams to build flexible wound-cover solutions for cuts, grazes and minor burns. Its low-lint, non-woven construction conforms to body contours and is easy to position for effective coverage on hands, joints and other high-movement areas.

Engineered for dependable performance, AeroPad™ helps standardise wound care across busy environments. The combination of a gentle non-adherent surface and an efficient absorbent layer supports practical changeovers and user comfort, making it a smart choice for day-to-day first aid readiness and clinical triage.

- **Non-adherent contact layer:** helps reduce pain and trauma on removal.
- **Absorbent inner core:** manages exudate for drier, more comfortable wear.
- **Sterile and latex free:** suitable for sensitive users and diverse settings.
- **Soft, conformable pad:** low lint design sits neatly under tape or film.

The **Size:** 10 × 10 cm pad delivers broader coverage for larger cuts, grazes and minor burns while remaining comfortable on contoured areas.

Packaged in **boxes of 3** to support small kits and quick replenishment without excess waste. Each pad measures 10 × 10 cm for dependable coverage under film, tape or a conforming bandage.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
