PRODUCT DESCRIPTION

AeroShield Nitrile Finger Cots are meticulously designed to provide superior protection and comfort for various first aid and medical applications. These high-quality finger cots are crafted from durable nitrile, offering exceptional flexibility and puncture resistance, making them an ideal choice for professionals who demand reliability and performance. The nitrile material ensures a snug fit while maintaining comfort, allowing for extended use without irritation. Available in a variety of sizes, they cater to diverse needs, ensuring a perfect fit for every user. The ambidextrous and anatomically shaped design enhances user comfort, facilitating ease of use for both left and right-handed individuals. Powder-free, these finger cots deliver optimal grip in both wet and dry conditions, ensuring precision and control during delicate tasks. The vibrant blue colour enhances visibility, making it easy to detect any splits or tears, thereby maintaining safety standards. Pre-rolled for convenience, they are quick and easy to apply, saving valuable time in critical situations. Additionally, their anti-static properties make them suitable for use in environments sensitive to static electricity. AeroShield Nitrile Finger Cots are an indispensable component of any first aid kit, ensuring both safety and efficiency in every application, from medical examinations to electronic handling.

The AeroShield Nitrile Finger Cots in X-Large size provide exceptional protection and comfort for larger fingers. Designed to offer a snug fit without compromising flexibility, these finger cots are perfect for professionals who require reliable performance. The ambidextrous and anatomically shaped design ensures ease of use, while the vibrant blue colour enhances visibility for safety.

AeroShield Nitrile Finger Cots in a box of 100 offer ample supply for extended use. This quantity ensures that professionals have enough finger cots on hand for various applications, providing reliable protection and comfort consistently. Ideal for medical settings
