PRODUCT DESCRIPTION

AeroPlast Premium Visual is a blue, visually detectable adhesive bandage range engineered for food preparation and handling environments. The vibrant colour stands out against ingredients and work surfaces to support swift identification should a dressing come loose. Each bandage is latex free and hypoallergenic to suit a broad workforce while maintaining dependable performance through busy shifts.

A premium backing film creates a barrier to water, oil and grease while remaining breathable for all-day comfort. The flexible construction conforms to fingers, knuckles and hands, helping the bandage stay put during repetitive tasks and frequent handwashing. Dressings are sterile and single-use, supporting professional hygiene standards.

SupaBond adhesive delivers reliable, long-lasting hold that resists edge lift in hot, steamy or wet conditions common to kitchens and food processing lines. Beneath the film, the SupaSorb wound pad draws fluid into internal pockets to help keep the site cleaner and

more comfortable. A non-adherent contact layer supports gentler removal when it's time to change, helping minimise disruption on the line.

- Blue visual design: easy to spot in food areas to aid hygiene checks.
- Waterproof barrier film: resists water, oils and grease while staying breathable.
- SupaBond adhesive: high holding power that helps prevent edge lift.
- **SupaSorb pad:** super-absorbent with a non-adherent contact layer for comfort.
- Latex free and hypoallergenic: designed for broad skin compatibility.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
