PRODUCT DESCRIPTION

The CARDIAC Mini AED Trainer is a fully functioning training defibrillator with a compact design. Its small 100x80x18mm footprint makes it ideal for remote training packages or those looking to save space.

With this training unit, responders will become familiar with an AED and gain the basic skills necessary to use one in an emergency situation. The Mini can be used to practice basic life support skills such as rescue breathing and CPR.

Designed for ease of transport, the Mini is straightforward to use with its one-button operation.

The package includes the Mini AED Trainer, a set of adult and paediatric pads, a manual, and a USB cable, as well as batteries for easy set-up.
