## PRODUCT DESCRIPTION

The Yellow Poly AED Angle Bracket Sign is a compact and specialized signage used in emergency situations to indicate the location of an Automated External Defibrillator (AED). Measuring 22.5 x 22.5cm, it is designed to be easily noticed in various settings. Made of lightweight poly material, this sign can be mounted on walls, doors, or other surfaces with ease.

The bright yellow colour of the sign enhances its visibility, ensuring that it stands out even in low-light or high-traffic areas. This high visibility is crucial in emergency situations where time is of the essence. The durable construction of the sign ensures its longevity, allowing it to withstand harsh weather conditions.

The angle bracket design of the sign allows for easy installation at a visible angle, making it visible from multiple directions. This feature ensures that individuals can quickly locate the AED in critical situations, facilitating prompt access to life-saving equipment.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
