<b>Kits - Case</b>	Soft Pack
<b>Is Dangerous Good</b>	No

## PRODUCT DESCRIPTION

The Commander 6 Series workplace first aid range is designed for rapid response and dependable coverage across busy worksites, vehicles, and facilities. Clearly marked as a Workplace Standard solution and built for everyday readiness, it helps teams act quickly when incidents occur while maintaining compliance with the SafeWork Code of Practice for Workplaces. The system scales from portable softpack cases to fixed cabinets to suit a wide variety of environments, from workshops and warehouses to fleets and field crews.

The versatile softpack option uses a reinforced fabric bag in high-visibility red for easy identification. A wide opening and robust zips make access straightforward, and the integrated shoulder strap supports grab-and-go portability between treatment areas, vehicles, and remote job sites. For static locations, rugged plastic and tough metal cabinet options are available; both are designed to be securely wall-mounted for consistent placement, rapid visibility, and tidy presentation in offices, production areas, and amenities rooms.

Ongoing readiness is simplified with the Surefill program. Purpose-designed refill pouches slip into each case type and present products through a centre-slit pocket, so first aiders can reach what they need fast without unpacking individual items. This speeds both incident response and post-incident restocking, helping maintain kit integrity and reducing downtime for safety teams responsible for multiple kits across a site.

Built around practical, real-world use, the Commander 6 Series brings together portability, visibility, and serviceability. The softpack measures 34 × 23 × 36 cm, making it compact enough for vehicles and mobile trolleys while still offering generous internal capacity for workplace needs. With clear external labelling and robust construction, it's a professional choice for organisations seeking consistent, compliant first aid coverage.

- **Workplace Standard compliant:** aligns with SafeWork Code of Practice for Workplaces
- **Reinforced softpack with shoulder strap:** portable, high-visibility design for mobile teams
- **Wall-mountable cabinet options:** tough metal or rugged plastic for fixed sites
- **Surefill compatible:** quick, organised refills via centre-slit pouches
- **Generous capacity:** sized for active worksites while remaining easy to stow
- **Clear external identification:** fast recognition in emergencies
- **Dimensions:** 34 × 23 × 36 cm for flexible placement in vehicles or facilities

Softpack first aid kit measuring **34 × 23 × 36 cm** in a high-visibility red reinforced fabric case with an integrated shoulder strap—compact for vehicles yet spacious for active worksites.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
