PRODUCT DESCRIPTION

The COMMANDER 6 Series First Aid Kit Refill is a comprehensive collection of modern first aid consumables designed to bring a depleted first aid kit back to full readiness in one simple step. It brings together dressings, bandages, tapes, wipes, gloves and key emergency accessories so workplaces, trade vehicles and busy households can restore their first aid coverage quickly without having to source individual items. This refill is ideal for environments that already have an installed case or cabinet and simply need to refresh

the contents to stay prepared for everyday injuries and workplace compliance checks.

Carefully selected components support treatment of common injuries such as cuts, grazes, minor burns, sprains and eye irritations, as well as more serious incidents where bleeding control and wound coverage are essential while waiting for professional help. An assortment of adhesive dressings, gauze swabs and wound pads helps provide appropriate coverage for different wound sizes across the body, while bandages and fixation tapes assist with securing dressings and supporting soft tissue injuries. Multiple cleansing options, including single use ampoules and wipes, assist with gentle cleaning of the skin prior to dressing.

The COMMANDER 6 Series First Aid Kit Refill is particularly suited to medium and large workplaces, construction sites, warehouses and high risk facilities where there is a constant flow of staff, visitors and contractors. It is also valuable for community venues, schools, sports clubs and home workshops that want an organised and reliable selection of first aid essentials ready for immediate use. The breadth of contents supports quick response to incidents in offices, manufacturing areas, lunchrooms and outdoor work zones, helping maintain productivity and peace of mind for staff and managers.

Each component in the refill is supplied in clearly identified primary packaging so the right item can be located quickly during an incident. The range of gloves, swabs and waste bags assists with basic infection control and safer handling of blood or body fluids, while eye and wound irrigation options help manage contamination until further care is available. With this refill on hand, a tired or partially used kit can be restored to a dependable, well organised resource that supports confident first aid in the home, in vehicles or across the workplace.

- **Comprehensive coverage:** replenishes a wide range of first aid consumables in a single refill.
- **Workplace ready:** suited to many medium and high risk work environments.
- **Fast restocking:** simplifies bringing an existing case or cabinet back to full readiness.
- **Supports everyday incidents:** helps manage cuts, burns, sprains and eye irritation at home or work.
- **Organised response:** clearly identified items assist quick selection during emergencies.

This configuration is supplied as a dedicated refill for compatible COMMANDER 6 Series first aid kits, making it ideal when an installed cabinet or case is already in place and only the internal consumables need to be refreshed.

Provided as 1 complete refill unit, this option delivers a full assortment of first aid consumables in a single bundle so an existing COMMANDER 6 Series cabinet or case can be restocked quickly without ordering individual items.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
