

ADDITIONAL INFORMATION

Weight	0.16 kg
Dimensions	4 × 4 × 21 cm
Carton Qty	25
Pricing Unit	Unit/1
Size	100ml
Min Order Qty	25
ARTG ID	142720
GMDN Code	37207
Medical Device Class	Class 2a
UNSPSC Code	46181812
Tax Schedule	Taxable
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No
Shelf Life (Months)	36

PRODUCT DESCRIPTION

AEROWASH Drop Eyewash is a sterile 0.9% sodium chloride eye and wound irrigation solution built for fast, confident first aid. The isotonic formula works with the body's natural balance, making it suitable for flushing out dust, grit, and airborne irritants from the ocular area and for rinsing minor cuts before dressing. The compact, easy-control bottle supports a steady, directed stream so responders can focus on comfort and coverage during the crucial first moments of care in workplaces, schools, healthcare rooms, and mobile kits.

An integrated eye cup helps position the bottle for a natural fit around the orbital area, guiding the flow across the surface of the eye to improve rinsing efficiency. A rapid twist-top enables quick activation while maintaining sterility until use, reducing delays when time matters. The design is compatible with the DROP Eyewash Station AWDS01, keeping refills organised, highly visible, and ready at the

point of need. Whether topping up a wall station or supplying vehicles and site kits, the format supports reliable deployment in diverse environments.

Chosen across a wide range of industries, this sterile saline eyewash and wound irrigation solution provides dependable performance without stinging. The clear 0.9% sodium chloride eye wash assists in clearing and cleaning while supporting calm, controlled application. From warehouses and workshops to classrooms and community facilities, AEROWASH helps teams respond effectively until further assessment is arranged. It's a practical choice where compatibility, simplicity, and consistent flow make the difference between hesitation and action.

- **Sterile 0.9% saline:** isotonic solution assists in clearing and cleaning eyes and wounds.
- **Integrated eye cup:** positions and directs flow for comfortable, effective flushing.
- **Rapid twist-top:** quick to open while maintaining sterility before activation.
- **Station compatible:** fits the DROP Eyewash Station AWDS01 for organised access.
- **Portable design:** compact bottle supports steady control in tight or mobile settings.

Supplied as a **100 mL bottle**, ideal for single-use irrigation and quick replenishment in stations, cabinets, and vehicle kits. The compact bottle with integrated eye cup and twist-top supports fast access and controlled flow.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
