## PRODUCT DESCRIPTION

The AeroKit Modulator White Food & Beverage Cuts Module is a compact, injury specific first aid module designed to manage everyday cuts, grazes and minor wounds in food handling and beverage environments. Packed in a soft, versatile case, it keeps key wound care items together and easy to find so that small injuries can be managed quickly and confidently. The slim profile fits neatly into a larger Modulator first aid kit, a workplace cabinet or a household drawer, while still offering ample space for dressings, bandages and cleansing products tailored to minor bleeding injuries.

This module forms part of the broader Modulator concept, which organises first aid into colour coded injury specific groups for fast selection in an emergency. The white case clearly identifies the focus on cuts and grazes, making it well suited to kitchens, cafes, food production areas and hospitality sites where minor nicks and scrapes are common. The dedicated layout helps users immediately locate adhesive plasters, dressings, tape, antiseptic spray, cleansing wipes, gauze, gloves and basic instruments needed to treat small wounds, all in one place.

Designed for real world workplaces, the Modulator White Food & Beverage Cuts Module supports compliance with standard workplace first aid expectations when used within a complete Modulator kit. It is also practical for home kitchens, hobby spaces and vehicles where sharp tools, knives or equipment are used. The soft case is easy to grab and carry to the point of injury, helping responders bring all required items to the scene in a single, organised pouch. Clear external graphics indicate that it is intended for dealing with bleeding from minor cuts, giving both first aiders and injured people quick reassurance that appropriate supplies are on hand.

Its portable dimensions of 20 cm width x 10 cm height x 6 cm depth make it ideal for storing in drawers, cupboards, lockers or mobile trolleys often found in hospitality, catering and manufacturing environments. This compact size also works well in the home or while travelling, ensuring a focused selection of wound care essentials is always close by without taking up unnecessary space.

- **Injury specific focus:** dedicated module for cuts and grazes in food and beverage settings.
- **Organised layout:** groups wound care items together for fast, confident selection.
- **Portable design:** slim soft case with 20 x 10 x 6 cm dimensions for easy storage and transport.
- **Workplace ready:** supports compliance when used within a complete Modulator first aid kit.
- **Ideal for home and work:** practical for kitchens, hospitality venues and general household first aid.

This module focuses specifically on managing cuts and grazes in food and beverage environments, providing a clearly identified pouch dedicated to minor bleeding injuries where sharp tools and glassware are used every day.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
