PRODUCT DESCRIPTION

The OPERATOR 5 Series First Aid Kit Refill is a comprehensive refill solution designed to restore a depleted workplace or industrial first aid kit back to full readiness. It brings together an extensive mix of dressings, bandages, wound cleaning products and useful accessories so a kit can continue to support day to day incidents and unexpected emergencies. The refill layout is planned to suit busy environments such as warehouses, factories, construction sites and workshops, while also working well for offices, schools and

community facilities that want a higher level of cover.

This refill supports treatment of common workplace injuries including minor cuts, grazes, burns, eye irritation and sprains. Multiple sizes and types of dressings help protect wounds on hands, limbs and body, while cohesive and elastic bandages assist with support and compression. Saline and cleansing options make it easier to clean the area before applying dressings, and disposable gloves promote good hygiene practice. The selection of items is also practical for household use, providing a central stock of essentials that can replenish wall mounted kits or portable cases used around the home, in the garage or on outdoor activities.

Each item in the OPERATOR 5 Series First Aid Kit Refill is individually packed and clearly labelled, making it simple to find the right product quickly when time matters. The mix of components is suitable for higher risk workplaces that need a broad response capability, as well as general workplaces seeking a well equipped first aid station. The refill format provides a convenient way to maintain compliance with many workplace safety requirements by keeping first aid provisions current, while avoiding the need to purchase a completely new kit.

- **Comprehensive workplace cover:** supports treatment of a wide range of common injuries in industrial and general environments.
- **Ideal for refilling:** restores depleted first aid kits to full capacity without replacing existing cases or cabinets.
- **Organised components:** individually packed and clearly labelled items help users quickly locate what they need.
- **Suitable for home and travel:** provides a large supply of essentials to replenish kits used around the house, in vehicles or on trips.
- **Designed for higher risk settings:** well suited to warehouses, manufacturing, construction and similar workplaces.

This configuration is supplied as a complete refill for a compatible first aid case, ideal when the existing outer case is still in good condition and only the internal components need renewing.

Supplied as a single complete refill set, this option delivers the full assortment of components in 1 unit, making it easy to restore a compatible first aid kit to full readiness with a single purchase.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
