Kits - Case	Tough
Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit Operator 5 Series Metal Tough First Aid Kit is designed to support fast, organised response to injuries in busy workplaces. Housed in a durable metal cabinet, it offers a clearly marked, highly visible station that keeps critical first aid essentials together in one secure place. The cabinet can be wall mounted to free up bench space and position the kit where it is easiest to see and reach during an emergency.

The tough metal construction helps protect contents from dust, knocks, and everyday wear in workshops, warehouses, factories and other demanding environments. A key-lockable door supports security and controlled access, helping you manage restocking and ensure that the kit remains complete and ready when it is needed most. Inside, a structured layout and clearly identifiable packs make it easier to quickly find items such as dressings, bandages, cleansing products and personal protection.

This workplace-focused kit aligns with common national workplace first aid expectations for medium to large teams and is suitable for a wide range of low to high activity settings. From manufacturing lines and logistics hubs to offices and retail spaces, it is built as a central point for everyday incidents such as minor cuts, grazes, sprains and eye irritation. The integrated refill system allows the contents to be replenished using compatible refill pouches that are designed to slide straight into the cabinet, so you can keep the kit compliant with minimal disruption.

The Operator 5 Series family has been planned to support consistent first aid standards across multiple sites. The metal cabinet option is particularly suited to fixed installations where visibility, robustness and tamper resistance are important. With a clean white finish and bold green first aid markings, the cabinet is easy to spot from a distance, helping workers, visitors and first aiders locate first aid support quickly and confidently in an emergency.

- **Rugged metal cabinet:** helps shield contents from dust, impacts and workplace wear.
- **Wall mountable and lockable:** supports secure, highly visible placement in busy areas.
- **Comprehensive workplace focus:** designed to support rapid response to common injuries.
- **Organised internal layout:** makes essential items quick to identify and access.
- **Easy replenishment:** compatible with dedicated refill pouches for efficient restocking.

This metal cabinet configuration suits workplaces that need a tough, wall mounted first aid station able to handle dust, knocks and daily activity while remaining easy for staff and visitors to see.

Supplied as 1 complete unit measuring 42 x 28.5 x 13 cm, this first aid kit offers generous internal capacity while remaining slim enough to mount neatly on walls in corridors, lunchrooms, workshops or reception areas.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
