Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit OPERATOR 5 Series Plastic Tacklebox First Aid Kit is a portable workplace solution designed to support rapid response to common injuries. Housed in a durable plastic tacklebox, it keeps a broad selection of dressings, bandages and first aid components organised and easy to see at a glance. The structured layout helps users quickly locate what they need during busy shifts, whether they are in warehouses, workshops, construction sites or active household garages.

This kit range is built around compliance with workplace first aid regulations across Australian states and territories, making it a strong choice for businesses that need coverage for higher risk environments. The sturdy outer case is strong yet lightweight, supporting easy transport between work areas, vehicles and remote job sites while helping to protect the contents from dust and light knocks. Generous internal capacity allows for comprehensive stocking so that multiple incidents can be managed before restocking is required.

The OPERATOR 5 Series kits are suited to teams that need a clear, central first aid point that can also be carried to the scene of an incident. The tacklebox style case opens widely so contents can be displayed on benches, treatment rooms or worksite stations, supporting efficient incident management. A wide range of high quality Aero branded wound care, bandaging and support items are included so workplaces can treat cuts, grazes, burns and other minor injuries promptly, helping injured people receive initial care while waiting for further assessment if required.

In addition to workplace settings, this style of kit is also helpful in large homes, hobby sheds and community facilities where multiple people are active and injuries are more likely to occur. The combination of portability, clear organisation and broad treatment capability makes it a practical choice for anyone responsible for first aid coverage. The case dimensions of 42 cm x 21 cm x 22 cm provide a compact footprint that still allows for generous internal organisation on shelves, in vehicles or mounted in designated first aid areas.

- **Comprehensive workplace support:** designed to help meet Australian workplace first aid requirements for higher risk areas.
- **Portable tacklebox design:** strong, lightweight case makes it easy to carry to incidents on site or around large homes.
- **Organised internal layout:** helps users quickly locate dressings, bandages and other first aid items when time matters.
- **Robust plastic construction:** protects contents in busy industrial, trade and commercial environments.
- **Generous capacity:** suitable as a central first aid resource for workplaces, community venues and larger households.

This tacklebox style configuration provides a compact, portable first aid station with a durable plastic outer and clear, multi-tiered internal layout that keeps important items visible and easy to access in busy workplace and household environments.

Supplied as a single complete tacklebox kit measuring 42 cm x 21 cm x 22 cm, this option provides a ready to use first aid resource that is easy to carry, simple to store and spacious enough to support use as a central kit in workplaces, vehicles and larger homes.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
