## PRODUCT DESCRIPTION

The AeroKit OPERATOR 5 Series Metal Tough Food & Beverage Kit is a comprehensive workplace first aid solution designed for food preparation and beverage manufacturing environments. Housed in a robust metal case, it is suited to busy kitchens, production areas, hospitality venues, and large commercial sites where hygiene and rapid response are essential. The durable cabinet offers reliable protection for the contents and is sized to be highly visible while still fitting neatly on a wall in food service corridors or preparation rooms.

This first aid kit brings together a wide range of dressings, bandages, antiseptics, eye care items, instruments, and support products to help manage common workplace injuries such as cuts, burns, grazes, eye irritation, and minor sprains. Layout and components support fast, organised access so items can be located quickly during stressful situations. The metal case construction suits environments where surfaces are regularly cleaned and where impact resistance is important.

Dimensions of approximately 42 x 28.5 x 13 cm make this kit compact enough for wall mounting while still providing generous internal space for well stocked contents. The configuration is ideal for workplaces that must meet food industry first aid obligations, and it is equally useful for large home kitchens, community halls, and catering operations. When mounted in a central location, staff can easily

identify and reach the kit, supporting confident, timely responses to incidents.

Because this is a medicated first aid kit, it supports rapid initial treatment of injuries before professional medical assistance is obtained if required. The selection of components is suitable for multi-shift workplaces where supplies need to support frequent minor incidents, helping maintain productivity and peace of mind for staff. The construction and layout are also suitable for use as a primary first aid station in wholesale, warehouse, and distribution settings linked to food and beverage operations.

- **Comprehensive workplace coverage:** configured for food and beverage environments and general workplace needs.
- **Durable metal case:** tough cabinet protects contents in busy commercial settings.
- **Generous internal capacity:** supports a broad range of first aid components for multiple users.
- **Highly visible design:** easy to identify in an emergency for rapid access.
- **Ideal for work and home:** suitable for commercial kitchens, hospitality sites, warehouses, and large household kitchens.

This first aid kit features a tough metal cabinet, making it ideal for locations that demand impact resistance and a professional appearance while still keeping first aid supplies easy to access on the wall.

Supplied as 1 fully stocked first aid kit in a metal cabinet, this option is ideal as a primary wall mounted station for a single workplace, large household kitchen, or community venue that needs comprehensive first aid coverage in one central kit.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
