PRODUCT DESCRIPTION

The OPERATOR 5 Series Food & Beverage Kit Refill is designed to completely refresh a compliant workplace first aid kit used in food handling and beverage production environments. It brings together a wide selection of dressings, bandages, wound cleaning products and essential first aid tools so staff can respond quickly to cuts, grazes, burns, eye irritation and everyday workplace incidents. The refill format makes it simple to restore a depleted kit to a ready-for-use standard without needing to check off individual items from multiple suppliers.

This refill is ideal for commercial kitchens, restaurants, cafes, food manufacturing lines, bars and hospitality venues, as well as canteens and break rooms in other workplaces. The broad mix of consumables supports day-to-day incidents that commonly occur around sharp utensils, hot equipment and busy preparation areas. Components are arranged to support organised restocking of an existing OPERATOR 5 Series Food & Beverage Kit so that every item has a clear place and can be found quickly when needed.

The assortment of dressing and bandage options supports coverage of different wound sizes and locations, making it suitable for hands, arms and other areas frequently exposed in food preparation. Cleansing solutions and wipes help workers manage minor contamination risks before dressing a wound, supporting good hygiene practices as part of broader workplace safety procedures. Additional accessories such as tapes, bags and basic tools help maintain a neat, functional kit that is ready for inspection and everyday use in busy environments.

Because this is a refill, it is particularly useful for safety officers and supervisors who want a straightforward way to keep first aid stations topped up across multiple sites. Keeping the kit fully stocked supports fast response, helps reduce downtime after minor injuries and provides peace of mind for both staff and management. It also means businesses can maintain the same familiar product range across all locations, so workers know exactly what to expect when they open the kit during an incident at work, at home or in community venues.

- **Comprehensive refill selection:** restores depleted OPERATOR 5 Series Food & Beverage Kits in one step.
- **Workplace ready:** tailored for food handling, beverage production and hospitality environments.
- **Hygiene focused:** supports clean management of minor cuts, grazes and burns before workers return to tasks.
- **Time saving:** simplifies restocking across multiple sites with a consistent set of first aid essentials.
- **Versatile use:** suitable for commercial kitchens, manufacturing lines, offices, and busy household kitchens.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
