

ADDITIONAL INFORMATION

Weight	0.02 kg
Dimensions	12.3 × 7.2 × 9.5 cm
Carton Qty	55
Pricing Unit	Each
Min Order Qty	1
ARTG ID	224587
GMDN Code	35171
Medical Device Class	Class 2a
UNSPSC Code	42271708
Tax Schedule	Non-Taxable
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroRescue Oxygen Therapy Mask supports reliable delivery of supplemental oxygen in first response, workplace first aid and clinical settings. The transparent facepiece allows easy visual assessment, while the contoured shape and soft edges help achieve a comfortable seal over the nose and mouth. An adjustable elastic strap assists with quick placement and secure positioning during treatment, even when the patient or responder is in motion. The lightweight build is easy to position and comfortable for short or extended periods of assisted oxygen therapy.

The mask interfaces with standard oxygen equipment used in emergency care to streamline setup when time matters. Its clear construction aids communication and observation, and the low-profile design helps maintain access to the airway and surrounding facial landmarks for monitoring. Built for compatibility with common oxygen regulators and tubing, it integrates smoothly into resuscitation workflows alongside bag valve masks and basic life support equipment used by trained responders.

Designed to assist responders in delivering air/oxygen gases to a patient, this mask is a practical choice for first aid rooms, ambulance kits and community response programs. The straightforward design supports dependable performance during oxygen therapy and resuscitation support without adding complexity to time-critical care, making it a smart addition wherever supplemental oxygen may be required. Durable materials and a soft feel help minimise pressure points during use, while the adjustable strap enables fast refinements so a secure fit can be maintained as the situation evolves. Clear visibility through the mask supports ongoing checks of skin tone, lip colour and condensation so carers can observe the patient without removing equipment.

Well suited to busy environments, the mask's streamlined shape helps keep the treatment area uncluttered for airway access, adjunct

placement and patient monitoring. Integration with commonly used oxygen delivery setups helps reduce delays and encourages consistent practice across teams, supporting responders as they deliver care in vehicles, clinics, workplaces and community settings.

- **Secure, comfortable fit:** contoured mask with adjustable strap for quick, stable placement.
- **Clear visibility:** transparent body supports patient assessment and communication.
- **Equipment ready:** connects with common oxygen delivery setups used in first response.
- **Workflow friendly:** low-profile design supports efficient airway management.
- **Observation friendly:** easy visual checks without removing the mask.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.

Oxygen Therapy Mask no Tubing
