

ADDITIONAL INFORMATION

Weight	0.04 kg
Dimensions	9.5 × 1 × 14 cm
Carton Qty	500
Pricing Unit	Qty 1
Size	3.2M x 10cm
Min Order Qty	1
ARTG ID	521420
GMDN Code	48127
Medical Device Class	Class 1s
UNSPSC Code	42312405
Tax Schedule	Taxable
Item Length	320
Item Width	10
Item Measurement Unit	cm
Is Medical Device	Yes
Is Serialized Item	No
Is Dangerous Good	No

PRODUCT DESCRIPTION

RapidStop Packing Gauze is a sterile, non-medicated woven strip created for realistic wound packing practice in first aid and prehospital training. The Z-fold layout dispenses in controlled lengths, helping users place material smoothly into deep or narrow cavities while maintaining consistent pressure. A compact, vacuum-sealed pouch keeps the gauze protected and ready for rapid access during drills and demonstrations, supporting confident, repeatable technique development.

The firm-handling weave resists bunching, so each segment seats reliably as layers are built. This control allows focused compression

where it is needed, mirroring real clinical expectations and helping learners understand pace, depth, and tactile feedback. Because it is single-use and sterile, sessions can run efficiently with hygienic turnover between learners, and instructors can demonstrate best practice without distraction.

RapidStop Packing Gauze integrates easily into bleeding control curriculums, skills labs, and workplace training programs. It behaves predictably under finger or instrument pressure and works effectively in high-fidelity simulations, including TraumaSim setups, to reinforce correct packing and compression principles. The generous format supports extended scenarios and multiple repetitions, making it a practical choice for responder courses and competency refreshers.

Designed for reliability, the Z-fold format reduces tangles and speeds application, while the vacuum-sealed presentation travels neatly in training kits and demonstration sets. Whether used in basic first aid classes or advanced responder training, this gauze provides consistent, professional handling so learners can focus on building skill and confidence that transfers from the classroom to real-world readiness.

- **Z-fold format:** dispenses in controlled lengths for swift packing.
- **Vacuum-sealed pouch:** compact and protected until needed.
- **Sterile, non-medicated:** single-use for hygienic practice.
- **Generous coverage:** ample material for layering and pressure.
- **Training ready:** compatible with bleeding control simulators.

Supplied as a single unit in a vacuum-sealed pouch with a generous training length and width, ideal for extended scenarios and multiple repetitions. The size supports layered compression while keeping classroom kits compact.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
