## PRODUCT DESCRIPTION

The AeroKit REGULATOR Sharps Disposal Kit is designed to support safe, efficient management of needles, syringes and other sharps that may be encountered in everyday environments. It brings together key sharps handling and containment items in a compact,

portable case that fits easily into workplace cabinets, vehicles, public facilities and home first aid stations. The organised layout helps users quickly find what they need in stressful situations so hazardous items can be secured with minimal delay.

This sharps disposal kit is suitable for use in schools, offices, retail spaces, gyms, community centres and other public settings where accidental needle stick risks can occur. It also suits hospitality venues, building sites and service vehicles that need a simple way to respond if sharps are discovered. The durable plastic case helps protect the contents from dust and splashes while remaining lightweight enough to be carried to the incident. Clear internal organisation supports a logical sequence of use, helping users move from protection, to collection, to containment and clean-up.

Inside the kit is a selection of sharps handling tools, containment solutions and hygiene items that work together to reduce exposure risks. Single-use components help limit cross-contamination, while dedicated sharps disposal containers provide a secure location for used needles and other sharp objects. Supporting accessories such as gloves and surface items help create a barrier between the responder and the hazard. Together, these elements make the kit a practical addition to general first aid equipment in workplaces, vehicles and community settings.

By keeping a sharps disposal kit close at hand, organisations and households can respond more confidently when hazardous sharps are found. The ready-to-go format saves time gathering individual products and supports a more consistent response, which is especially valuable for staff who may not deal with sharps incidents regularly. The compact 21 x 7.5 x 13 cm dimensions make it easy to store in cupboards, mounted cabinets, utility rooms or vehicle storage areas while still being large enough to hold the essential components for a controlled clean-up.

- **Complete sharps solution:** combines key items for safe collection, containment and disposal.
- **Portable, compact case:** 21 x 7.5 x 13 cm design is easy to store in workplaces, vehicles and homes.
- **Supports safer clean-up:** helps reduce contact with needles, syringes and contaminated waste.
- **Ideal for shared spaces:** suited to schools, offices, public facilities and community venues.
- **Ready when needed:** pre-assembled kit saves time in emergencies and complements general first aid supplies.

This configuration features a compact hard case measuring 21 x 7.5 x 13 cm, providing a space-efficient sharps solution that fits easily into cupboards, wall cabinets, vehicles and home storage while remaining comfortable to carry to the incident.

Supplied as 1 complete sharps disposal kit in a portable hard case, this option is ideal when a single, ready-to-use sharps solution is needed for a workplace, vehicle, community venue or household.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
