Kits - Industry	Construction / Outdoor / Remote Location, Food Preparation, Office / Retail
Kits - Case	Weatherproof
Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit Regulator Burns A First Aid Kit is a compact, purpose designed burns module that helps deliver rapid, initial care when contact with heat, flame, hot surfaces or steam causes injury. Its organised layout and dedicated burn dressings support fast decision making in stressful moments at home, at work or while travelling. The lightweight hard case protects the contents and includes an integrated carry handle so the kit can be moved quickly to the scene of an incident, whether that is a kitchen, workshop, classroom or outdoor barbecue area.

This focused burns kit supports the rapid, initial treatment of burn injuries by helping cool, cover and protect the affected area. Having a dedicated burns kit on hand can reduce delays while searching through larger general first aid supplies, giving carers confidence that suitable products are immediately available. The selection of dressings and related items is suited to treating a range of minor to moderate burn sizes, making the kit a practical choice for households, small workplaces and vehicles.

The compact case measures approximately 21 x 7.5 x 13 cm, making it easy to store in cupboards, drawers, vehicles and site offices without taking up unnecessary space. Its portability makes it suitable for mobile workers, tradespeople and community groups who need reliable burns cover on the move. Clear labelling on the front of the case helps users quickly identify that this is a burns specific first aid resource, supporting fast access in an emergency.

Ideal for environments with hot equipment, cooking appliances or outdoor fire risks, this kit gives peace of mind that essential burns care items are close by. It is well suited to home kitchens, food preparation areas, workshops, schools, early learning centres and outdoor activity groups where contact burns and scalds are a known hazard. Adding the AeroKit Regulator Burns A First Aid Kit to existing first aid provisions helps build a more complete safety plan for families, staff and visitors.

- **Dedicated burns coverage:** supports rapid, initial treatment of burn injuries in home, workplace and travel settings.
- **Compact hard case:** durable and portable design that fits easily into cupboards, vehicles and first aid stations.
- **Easy identification:** clearly labelled burns kit for quick selection during emergencies.
- **Efficient organisation:** focused selection of items helps carers respond quickly without searching through larger kits.
- **Versatile use:** suitable for kitchens, workshops, schools, community venues and outdoor activities.

This first aid kit features a compact burns module design, making it ideal where a dedicated burns resource is required alongside general first aid supplies.

Configured as a single unit measuring approximately 21 x 7.5 x 13 cm, this kit offers convenient burns coverage for one key location such as a kitchen, workshop, office, vehicle or site office.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
