Kits - People (Low Risk)	50
Kits - Treatments	Burns
Kits - Industry	Construction / Outdoor / Remote Location, Food Preparation, Office / Retail
Kits - Case	Weatherproof
Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit REGULATOR Burns C First Aid Kit is designed to support rapid initial care when someone experiences a burn in the home, workplace, school, or community setting. This dedicated burns kit brings key burn care items together in a single organised case so that essential supplies are easy to locate in a stressful moment. The compact case and practical layout help users move quickly from recognising an injury to starting first aid, which is especially important for hot surface contact, scalds, minor flame exposure, or workplace incidents involving heat and friction.

This focused burns solution complements general first aid kits by concentrating on cooling, protecting, and covering burn areas. Clearly grouped burn dressings, bandages, and related materials help users choose items suited to different body areas and burn sizes without sorting through unrelated products. The case dimensions of 24 cm x 24 cm x 7.5 cm make it simple to position on a wall, shelf, vehicle, or workstation, while still offering generous internal capacity for a comprehensive selection of burns care components. The kit is suitable for households that use hot appliances frequently, workplaces handling heat sources or hot liquids, and community environments where children and adults may be exposed to accidental burns.

For workplaces, the REGULATOR Burns C First Aid Kit provides a dedicated point of care that supports existing safety procedures and complements broader emergency planning. Employees can access burns-specific products quickly, helping them begin first aid while further medical help is arranged if required. In community and sports environments, the kit offers peace of mind for organisers responsible for participant welfare. At home or while travelling, it provides a convenient way to keep burns care essentials in one place rather than relying solely on a standard first aid kit that may only include limited burn items.

- **Dedicated burns coverage:** focused selection of burns care items in one organised kit.
- **Compact case dimensions:** 24 cm x 24 cm x 7.5 cm sizing suits wall mounting, vehicles, and cupboards.
- **Supports rapid response:** layout helps users find burns items quickly in an emergency.
- **Suitable for multiple settings:** ideal for home, workplace, schools, vehicles, and community venues.
- **Complements general first aid:** enhances existing kits with specialised burns capability.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
