## PRODUCT DESCRIPTION

The REGULATOR Premium Snake & Spider Bite Kit is a compact, purpose designed first aid solution for managing bites and stings from venomous snakes, spiders and marine creatures in Australia. Built around dedicated pressure immobilisation bandages with integrated tension indicators, it helps users apply firm, even compression along the limb while keeping it still, supporting best practice care in a high stress situation. The soft yet durable case keeps essential items together and easy to access, so you can focus on calming the casualty and responding quickly.

This kit suits a wide range of environments where contact with snakes and spiders is possible, including bushwalking, camping, farming, landscaping, construction and remote work. It is also a smart addition to home, vehicle and workplace first aid supplies in regions where encounters with venomous creatures are more common. The streamlined layout lets even less experienced users locate key components fast, while the included splint and supporting materials help maintain limb stability during transport.

The REGULATOR Premium Snake & Spider Bite Kit is designed to be highly portable without sacrificing capability. The softpack bag can be carried in a backpack, stored in a 4WD, or attached to a belt or work bag so it is on hand when needed. Clear labelling and creature icons make the kit easy to recognise in an emergency, and the interior has space for additional personal items if required. This makes it suitable for outdoor enthusiasts, parents, field workers and anyone who spends time in regional or bushland areas.

Whether you are planning a day hike, running a school excursion, managing a rural property or outfitting a workplace first aid station, this kit provides focused support for venomous bites alongside general first aid resources. Keeping a dedicated snake and spider bite kit close by offers peace of mind that you are better prepared to respond while waiting for medical assistance, helping protect family members, colleagues and fellow travellers in a wide variety of settings.

- **Targeted design:** tailored for Australian snake, spider and marine creature bites.
- **Tension indicator bandages:** assist with applying consistent compression.
- **Highly portable:** compact softpack fits belts, vehicles and backpacks.
- **Outdoor ready:** ideal for bushwalking, camping, farms and remote work.
- **Versatile use:** valuable for home, travel, workplace and community first aid.

This configuration features a compact soft case measuring 19.5 x 13 x 9 cm, providing generous internal capacity while remaining easy to carry on a belt, in a backpack or in a vehicle for quick access in higher risk environments.

Supplied as 1 complete kit, this option offers a single, ready to use snake and spider bite resource that can be placed in the home, a vehicle or a workplace bag so it is always available when travelling, working outdoors or exploring bushland.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
