PRODUCT DESCRIPTION

The AeroKit REGULATOR Remote Work First Aid Kit is designed to support people who work or travel away from immediate medical help. Compact yet comprehensive, it helps manage common injuries that may occur in remote or outdoor environments, on work

sites, in vehicles, or during field visits. The organised layout makes it easy to quickly locate key items when time matters, helping users respond calmly and confidently in stressful situations at home, on the road, or at work.

This portable first aid kit is housed in a soft case that is easy to carry, stow and access. The dimensions of 19.5 x 13 x 9 cm make it small enough to fit in a backpack, vehicle compartment or equipment bag, while still providing room for a well thought out selection of dressings, tapes, bandages and basic emergency items suited to remote settings. Clear internal sections assist with fast identification of supplies so users can grab what they need with minimal delay.

The kit supports rapid, initial treatment of injuries such as cuts, grazes, minor burns, sprains and strains, as well as more serious incidents where basic stabilisation is required until professional care is reached. It is suitable for lone workers, small teams in remote locations, outdoor enthusiasts and families who spend time camping, hiking or touring. By keeping essential first aid items together in one dedicated kit, it reduces the risk of missing supplies when they are needed most and encourages consistent safety practices in the home, workplace and community.

Whether it is kept in a 4WD, service vehicle, farm ute, workshop, office, or home emergency cupboard, the AeroKit REGULATOR Remote Work First Aid Kit offers peace of mind that essential first aid resources are on hand. The compact profile and lightweight design mean it can be taken to job sites, client visits and recreational activities without adding bulk, making it a practical choice for people who are frequently on the move.

- **Compact design:** 19.5 x 13 x 9 cm size fits easily into vehicles, bags and small storage spaces.
- **Remote ready:** curated to support rapid, initial treatment when professional help may be delayed.
- **Organised layout:** segmented internal compartments help users find items quickly.
- **Portable solution:** ideal for remote workers, travellers, outdoor activities and home preparedness.
- **Everyday coverage:** supports treatment of common injuries in workplaces and households.

This remote work first aid kit focuses on supporting people who travel or operate away from immediate medical help, offering a compact case designed for vehicles, field work and outdoor activities.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
