Kits - Industry	Education – Excursions / Offsite Activities, Home / Personal
Kits - Case	Soft Pack
Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit REGULATOR Snake Bite Kit is a compact, purpose-designed first aid kit created to support fast, organised care in the critical moments after a suspected snake bite. Sized at just 8 cm x 7 cm x 12 cm, it fits easily into day packs, work vehicles, toolboxes and household cupboards, so it can be kept close at hand whenever people are active in areas where snakes may be present. A durable soft pack case helps the kit sit neatly in bags and on shelves while remaining easy to grab in an emergency.

This snake bite kit is focused on pressure immobilisation, using AeroForm snake bite bandages with a built-in tension indicator to help users apply firm, even pressure along the affected limb. The bandages are designed for Australian conditions and typical outdoor environments, supporting effective response when hiking, camping, working on rural properties or spending time in bushland. A triangular bandage and other supporting items complement the compression bandages, helping keep the limb still and supported.

An easy-to-follow first aid guide is included to provide clear direction while help is being arranged, which is especially valuable for people who may feel stressed or uncertain in an emergency. The guide reinforces key steps and helps bystanders work together while waiting for medical professionals. Because the kit is reusable, it can be restocked after use so it remains a long term part of home, workplace and vehicle safety planning.

Compact dimensions make this kit ideal for home and household use, glove boxes, caravans, 4WDs, boats and workplace vehicles that travel through bushland or regional areas. It is also well suited to outdoor education programs, school excursions and community events held in parks or reserves. Keeping a dedicated snake bite kit within reach provides added peace of mind whenever people are walking, gardening, exploring or working in environments where venomous snakes are a known risk.

- **Snake bite focused:** specifically configured for pressure immobilisation of limbs after a suspected bite.
- **Tension indicator bandages:** AeroForm bandages assist users in applying firm, consistent pressure.
- **Portable soft pack:** compact 8 cm x 7 cm x 12 cm case fits easily into bags, vehicles and small storage spaces.
- **Clear first aid guide:** step-by-step support helps users follow best practice while awaiting medical help.
- **Versatile for many settings:** ideal for home, outdoor recreation, workplaces and vehicles in snake prone areas.

This first aid kit focuses on a dedicated snake bite layout, providing a compact, purpose-designed kit that supports pressure immobilisation of limbs using specialised bandages with a built in tension indicator.

This kit is supplied in a compact 8 cm x 7 cm x 12 cm soft case, providing a portable first aid kit that fits easily into backpacks, glove boxes, toolboxes and household cupboards while still holding dedicated snake bite response components.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
